EPSY Procedures for Receiving Informal Feedback Regarding Promotion to Professor
Approved February 18, 2013

Associate Professors may request feedback from members of the T&P Committee who hold the rank of Professor about the status of their record vis-à-vis for promotion to Professor at any time. These reviews will take place at the end of the T&P Committee’s spring meeting.

Candidates will submit a vita and Candidate’s Statement on Teaching, Research, and Service. They also may provide other materials that are part of the portfolio used in T&P reviews (e.g., Teaching Evaluation Packet, Grants Chart, sample publications; see EPSY Tenure and Promotion Policies and Procedures, TAMU Tenure and Promotion Packages). The Candidate may designate an Advocate to summarize their record at the meeting.

The feedback provided to the Candidate is not binding and does not indicate whether a Candidate would be promoted to Professor. Rather, it is intended to provide constructive feedback about the relative readiness of the Candidate’s record to be reviewed and areas in which the record might be improved. This feedback is for use of the Candidate only and will not be shared with the Department Head unless the Candidate chooses to do so.
